EDUCATION

University of California, Berkeley – Haas School of Business <i>Master of Financial Engineering</i>	Berkeley, CA <i>Expected Mar 2027</i>
University of California, Berkeley – College of Computing, Data Science and Society GPA - 3.84/4.00 <i>Bachelor of Arts, Data Science in Applied Mathematics and Modeling</i> <i>Bachelor of Arts, Economics - High Honors (~20 students out of 800 i.e. 2.5%)</i>	Berkeley, CA <i>Dec 2025</i>

PUBLICATIONS

Academy of Management Discoveries (Peer-Reviewed Journal) <i>Co-Author - Firm Financial Performance and Organizational Culture under Environmental Volatility</i>	Berkeley, CA <i>Dec 2024 – Present</i>
- Identified “results-oriented” firm culture as strongest predictor of financial performance ($\beta=0.022$) with Tobin's Q model $R^2 = 0.63$, effect is stronger when “results-oriented” culture interacted with “tight” cultures ($\beta=0.163$) - Ran OLS/SEM on 1,113 firms using first-difference, curvilinear, moderation, interaction, mediation with industry fixed effects testing firm 2014-2020 culture X-var (e.g. “integrity”) impact on 2021-2023 Y-var (e.g. Tobin’s Q) - Engineered NLP scoring pipeline: fine-tuned GloVe word embeddings on 1.82M Glassdoor reviews to generate firm culture scores using Cosine similarity; integrated dataset from raw Compustat, Glassdoor, Covid Risk Index - Extracted 3 optimal culture profiles (X-vars) via k-means clustering Gap Statistic; co-authored with Dean of Haas	

PROFESSIONAL EXPERIENCE

FINVIA Multi-Family Office <i>UC Berkeley Haas MFE Industry Project - NLP Investment Research</i>	San Francisco Bay Area, CA <i>Jun 2026 – Present</i>
Building investment extraction pipeline over SEC EDGAR 10-K filings: Loughran-McDonald→FinBERT sentiment, transformer NER, relation/event extraction, BERTopic, LLM structured extraction, fine-tuned FinBERT classifier	
Franklin Templeton <i>UC Berkeley Haas MFE Industry Project - Municipal Bonds</i>	San Francisco Bay Area, CA <i>Mar 2026 – May 2026</i>
- Built LASSO muni credit spread model (spline maturity curves, call optionality features) date-grouped cross-validated over OLS/Ridge/ElasticNet/Huber: achieved test MAE=15bps on 3,219 unseen trades, $R^2=0.52$ - Layered peer-group residual-correction with lagged residuals (fallback: issuer, sector×rating, rating): achieved MAE=18.4bps → 16.6bps on 556 recent trades, analysis found -11% RMSE in calm but not in volatile regimes - Designed KNN coverage scorer to flag model confidence on predictions (Good/Medium/Weak) for \$45B portfolio	
CheckRx <i>Data Engineering Intern - Healthcare Data Infrastructure</i>	San Diego, CA <i>Jun 2025 – Aug 2025</i>
- Constructed database mapping 9,539 providers to plans from fragmented data via Selenium scraping pipeline with anti-bot detection, powering \$8.88M valued Medicare AI platform; saved \$25,000 in data processing fees - Deployed FastAPI serving real-time Medicare benefits + CMS star ratings across 5,666 plans via bulk endpoints	
CIMB Niaga <i>Summer Analyst - Corporate Banking Credit</i>	Jakarta, Indonesia <i>Jun 2024 – Aug 2024</i>
Performed fundamental analysis for \$2.9B food client by automating projection model (debt ratio calculations, cash-flows, scenario stress-testing); led \$30M loan approval past risk committee, saved 250 hours/year for desk	

RESEARCH EXPERIENCE

UC Berkeley Department of Economics <i>Honors Thesis Author - Policy Shocks: Stock Market Response of Indonesia’s Nickel Export Ban</i>	Berkeley, CA <i>Oct 2024 – Dec 2025</i>
- Isolated 2019 Indonesian nickel export ban’s asymmetric market impact: producer equities underperformed control equities by 55pp ($p<0.01$) while impact on consumer equities negligible and statistically insignificant - Specified 2-stage event study: estimated firm-level market models (α, β) against JCI Index over 20-month window; ran cross-sectional OLS on CAR (adj. $R^2=0.56$) on 15 firms: 5 producers, 3 consumers, 7 palm-oil controls	

Certifications: Passed CFA Level 1 | **Skills:** Python, SQL, R, MATLAB, ML | **Languages:** Bahasa Indonesia, Javanese, Malay
